The Environmental Science major serves students interested in helping to conserve, protect, and manage natural resources. Students complete 24 hours of core coursework, then specialize in one of three emphases (Chemistry, Geology, Biology), and complete the major with an independent research project, travel course, or internship.

At least 8-12 Core hours must be completed before pursuing a particular emphasis.

NOTE: Emphasis courses may have their own prerequisites. Chemistry courses are sequential. Most BIO courses require BIO 114/115 and BIO 124/125. Historical Geol. (GEO 203) and Topics in Geol. (GEO 340 or GEO 302) require GEO 108.

Students pursuing Environmental Chemistry cannot also major in Biochemistry or major or minor in Chemistry. Those pursuing Environmental Biology cannot also major or minor in Biology.

Students must earn a letter grade of C- or better in all courses needed to satisfy the major.

Students interested in Graduate School in a related area should also consider Calculus II and Physics I and II. Students interested in Environmental Law should consider a Pre-Law minor (18 credits). Finally, to extend the breadth of study in the major, students should also consider additional relevant electives, such as ENV/ENC 377 (Environmental and Resource Economics), ENV 300/ENG 315 (Environmental Literature), PHL 246 (Environmental Ethics), POL 326 (Environmental Politics and Policy), REL 324 (Religion and the Environment).
